

15:30–15:50 | NaaS Implementation Showcase

**TED WAGNER**

Global Lead, DynamicLink NaaS

**ELI KARPILOVSKI**

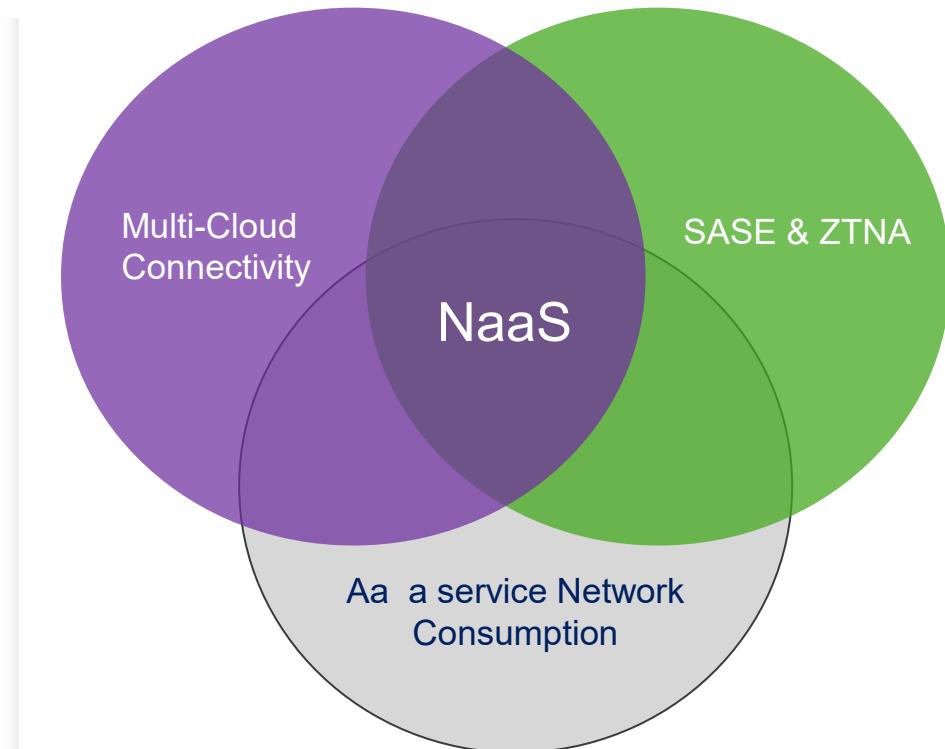

Founder & CEO

# Operators Are Missing from the Enterprise NaaS Conversations!

---

**“Network-as-a-Service (NaaS) is the combination of on-demand connectivity, application assurance, cybersecurity, and multi-cloud networking within a standards-based automated ecosystem.” [Mplify Forum](#)**

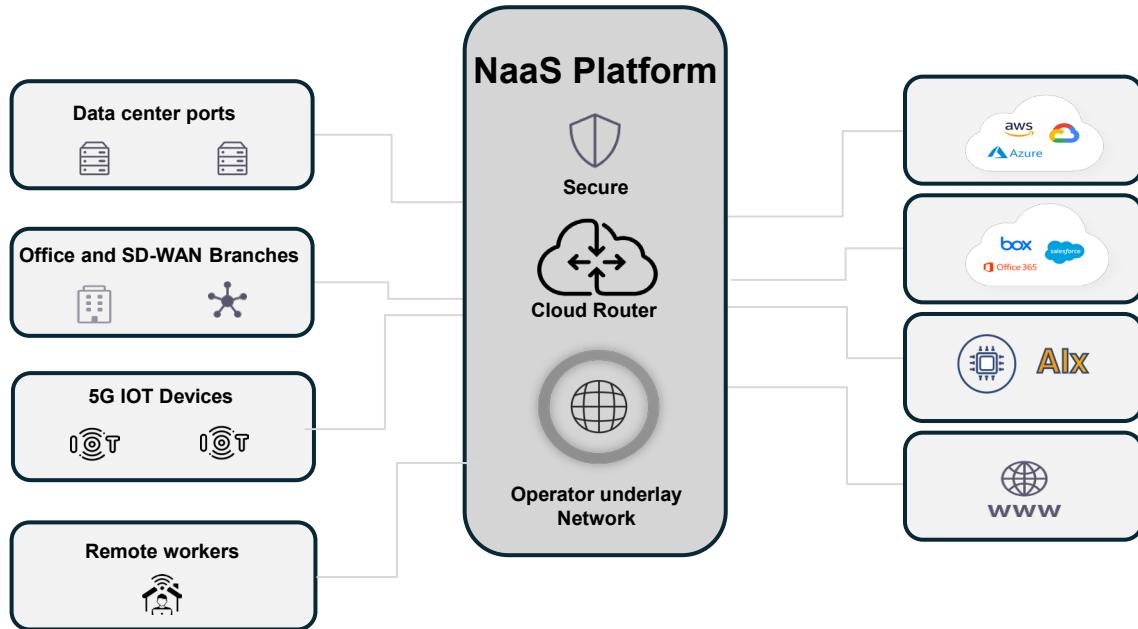

# Network-as-a-service for the multi-cloud, AI workloads, “work-from-anywhere” future

- A platform purpose-built for Service providers, network service providers, and data centers.
- Delivering scalable network automation and as-a-service consumption of cloud and AI networking, with inline security services.
- Designed to allow service providers to leverage their existing “underlay” network infrastructure as a cost structure and reach advantage.
- AI-driven platform simplifies operation and sales

# Insidepacket NaaS platform Use Cases

Differentiated in breadth

## Use Case 1:

Deploy flexible private networks in minutes

## Use Case 2:

Multi-cloud networking

## Use Case 3:

E2E Observability tools

## Use Case 4:

Elastic Internet

## Use Case 5:

FWaaS & DDOS

## Use Case 6:

SASE & Zero Trust

# DynamicLink

Connect : Protect : Operate

**Rich Set of  
Features**

**Rapid National  
Deployment**

**Leverage the  
Power of Our  
Network**
